FLEXIBLE SLEEVING TECHNICAL DATA – Ø50

Product description: Yellow flexible plasticized PVC ducting Ø50 – GTDUCT-DN2025-50M.

Applications: Protection for plastic or metallic installations (water, gas, electricity) not exposed to sunlight or subject to weather.

Marking: Gastite® - MADE IN THE UK – CVLLM45

Characteristics:

- Used material: plasticized and un-plasticized PVC
- Minimum operation temperature: -10°C
- Maximum operation temperature: +55°C
- Weight: 320g/m
- Efficient protection
- Easy installation
- Easy to handle
- Economical

Dimensions and tolerances:

- External diameter: 50.9mm ± 1mm
- Internal diameter: 45mm
- Max wall thickness: 5.9mm
- Length of the coil: 50M with a tolerance of (± 2%)

Storage:

- The ducting should be stored in covered areas and always protected from sunlight until used.
